Floor-level Bulk Container Tilters

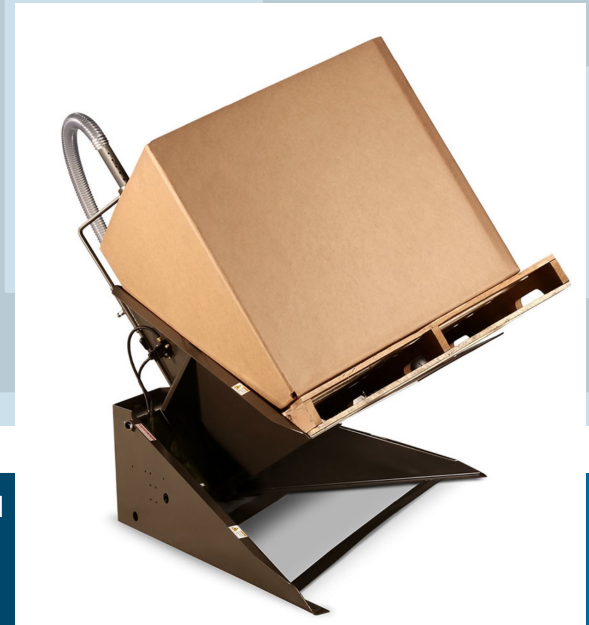

List Price \$3,137

Discounted Price \$ 2,509.60

floor-level bulk container tilters provide a reliable supply of process material to downstream production operations, without the frequent manual interactions and material monitoring typical of common tilt table designs. The automatic tilt function of NBE floor-level container tilters is what brings improved operator performance and safety to what is often a labor-intensive material handling process. As material is automatically vacuumed from the bulk container, the automatic tilt action initiates when the container weight and material level reach a pre-set point. During the tilt function, material in the bulk container flows toward the intake of the vacuum wand where the material is vacuumed from the bulk container and supplied to downstream equipment. Application-specific design features including material level indicator beacons and safety stops improve operator efficiency and safety.

Call - (815) 337-3000

Gaylord Container Tilter Floor level tilt table automatically tilts containers when the weight of the Gaylord reaches approximately 900 lbs., all remaining material is directed into one corner for complete product removal at a maximum of a 45-degree angle from horizontal. A single air connection is required and the unit is supplied with a pressure regulator that is adjustable between 0-50 PSI. Foot lever Control is supplied.

The Standard features and specifications are:

- 1) Overall dimensions are 52" x 71"
- 2) Floor space required: 71" x 80" when full tilted
- 3) Load height: floor loading
- 4) Tilt bucket includes an extension bar with 3 1/2" diameter wand holder.
- 5) Tilt action accomplished by heavy duty, multi-ply airbag.
- 6) Capacity: 2500 lbs. based on load at floor level, container tilts at approx. 900 lbs.
- 7) Minimum air requirement is 40 PSIG. Do not exceed 100 PSIG
- 8) Foot lever control with a 3-position controller with forward/neutral/reverse settings and regulator factory preset at 40 psi.
- 9) Constructed of 7-gauge carbon steel painted light gray.
- 10) Shipping weight is estimated at 430 lbs

Included with above floor level tilter:

Floor level safety device latch (#29-300) for model (29-650 floor tilter). In the event of an airline or air bag Failure, ratchet mechanism should active.

Notice: Safety device is intended to add a degree of safety to tilt table operation. It is not intended to be used in place of other safety devices, guards or rules.
